ACCESSORIES

BOX 30

STANDARD PLASTIC BOX FOR BCS30 BURNER CONTROL

APPLICATIONS

The **BOX30** plastic box's family are designed to be used together with **BCS30** platform equipped with the integrated user interface.

The presence of a large front gusset combined with high level of customization of the **BCS30** platform allows the customization of the aesthetics according to the customer's needs with:
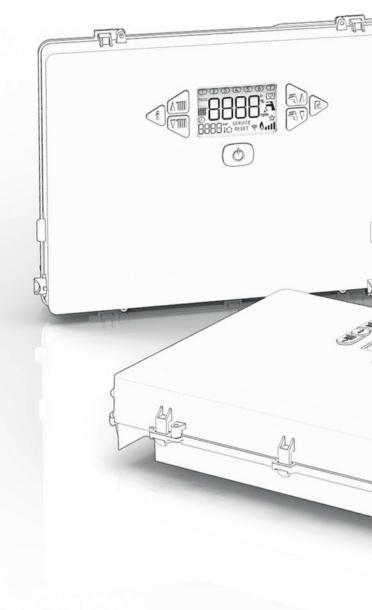

- LCD type and size
- Number and position of keys

In this way it is possible to completely change the appearance of the boiler while keeping the main components unchanged.

All the components (plastic, push buttons, screw terminal block....) except **BCS30** PCB are included.

The front panel of the BOX30 is fully customizable.
You can get different positions and shapes for the buttons and choose between different sizes for the LCD screen.

GENERAL FEATURES

- ABS V0 Plastic
- RAL 9010 or customized
- Color printing logo – symbols available
- Separate paths for high & low voltage cables
- Specific path for spark igniter
- Screw terminal block for power supply & HD
- Earth connection terminal block

COMPATIBILITY
